DETAILED ACTION

Election/Restrictions

1. The applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- A. The species wherein the gain-clamped amplifier has a non-reflective module at the input of the amplifier.
- B. The species wherein the gain-clamped amplifier has a reflective module at the input of the amplifier.

2. Upon election of one of species A or B above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- C. The species wherein the gain-clamped amplifier has a non-reflective module at the output of the amplifier.
- D. The species wherein the gain-clamped amplifier has a reflective module at the output of the amplifier.

3. Upon election of one of species A or C above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits

Art Unit: 3663

to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- (1) The species wherein the non-reflective module is an isolator.
- (2) The species wherein the non-reflective module is an anti-reflective coating.
- (3) The species wherein the non-reflective module is an oblate cut in the fiber.

4. Upon election of one of species B or D above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- (4) The species wherein the reflective module is an installed Bragg grating.
- (5) The species wherein the reflective module is an engraved Bragg grating.
- (6) The species wherein the reflective module is a multiplexer attached to a mirror.
- (7) The species wherein the reflective module is a wavelength-selective mirror.

Art Unit: 3663

5. Upon election of any of the species above, applicant is required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic):

- a The species wherein the amplification is performed by a semiconductor optical amplifier.
- b The species wherein the amplification is performed by an erbium doped optical fiber amplifier.
- c The species wherein the amplification is performed by a non-erbium rare-earth- doped optical fiber amplifier.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement (e.g., **A(2)-a-D(4) or B(4)-b-D(4)**), listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
